

Portfolio - myPortfolio application

Writeup

Steps

1. Start
2. Create a new Angular Project
3. Generate the required components – signup, signin and landing
4. In the landing (Home) page, add introductory things and a carousel.
5. The signup component contains a form for new user signup with an option to select duration of newsletters.
6. The signin component contains a form for the user sign in.
7. Add contents to the components, implement UI and functionalities.
8. Define the routes for the different pages in app.module.ts
9. Add the RouterModule.
10. In the app.component.html, include a header section which contains the hyperlinks with routerLink attributes.
11. Then add the routing tag in app.component.html
12. Apply required Bootstrap CSS and common global CSS through style.css
13. This leads to creation of the required SPA of Portfolio Application
14. End
